

# NEBULA (SW)

## SIX ROW SPRING FEED BARLEY

Nebula has the same high yield potential as WestBred Gustoe but has better test weight, is earlier and has better disease resistance.

### AGRONOMIC DATA

YIELD POTENTIAL	:	Excellent
TEST WEIGHT	:	Excellent (Best of the Best)
PLANT HEIGHT	:	Semi-Dwarf, 3 inches taller than Gustoe
UNIFORMITY	:	Excellent
AWNS	:	Awned - Blue Aleurone
YIELD STABILITY	:	Very Good

### DISEASE TOLERANCE:

Leaf Rust -----	M. Tolerant	Scald -----	V. Tolerant
Stem Rust -----	?	Powdery Mildew -----	V. Tolerant
Net Blotch -----	V. Tolerant	Bacterial Leaf Blight ----	Susceptible
Strip Rust -----	M. Susceptible		

RELATIVE MATURITY: 4 - 6 days earlier than Gustoe  
5 days later than UC 337

SHATTERING RESISTANCE: Excellent

THRESHABILITY: Good

### MANAGEMENT GUIDELINES

Same as for Gustoe.

AREA OF ADAPTATION: Southwestern United States.
