Improving Nature's Grains

Jedd

Hard Red Spring Wheat

A new WestBred Variety for the PNW

Jedd is a high yielding, **CLEARFIELD®**, hard red spring wheat. It is widely adapted to wheat producing areas of the PNW. This variety is a semi-dwarf with very stiff straw and is medium early in maturity. Jedd produces high test weight and above average protein. Jedd has two gene tolerance to the imidazolinone herbicide "Beyond" or **CLEARMAX®**. Jedd is tolerant to the Hessian fly biotypes found in the PNW and has similar stripe rust tolerance found in the varieties Hank and WB 926

- **CLEARFIELD® VARIETY**
- **Very High Yield & Test Weight**
- **Widely adapted**
- **Above average protein**

CLEARMAX™
HERBICIDE | for CLEARFIELD® wheat

BEYOND™
HERBICIDE | for CLEARFIELD® wheat
