AGRONOMIC TIPS

- Early maturity! Plant a little later to help avoid late spring freeze damage.
- Soil test and fertilize for your yield goals.
- Harvest as soon as possible to lessen the potential of pre-harvest sprouting.
- Increase seeding rates for high production, irrigated acres.
- Shorter stature can make harvesting more difficult on uneven ground.

The ratings are approximate and should not be considered absolute. Based on internally conducted trials relative to other WestBred® brand wheat varieties.

Individual results may vary, and performance may vary from location to location and from year to year. The result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.
